The Earth2Trump roadshow is rallying and empowering defenders of civil rights and the environment to resist Trump's dangerous agenda. Stopping in 16 cities on its way to Washington, D.C., it will bring thousands of people to protest at the presidential inauguration.

The shows feature national and local speakers, great musicians, and an opportunity to join a growing movement of resistance to all forms of oppression and all attacks on our environment. We must stand and oppose every Trump policy that hurts wildlife; poisons our air and water; destroys our climate; promotes racism, misogyny or homophobia; and marginalizes entire segments of our society.

Join us in your community to send a powerful, unwavering Earth2Trump message that oppression and environmental destruction will not be tolerated.
