***From the Ashes* captures Americans in communities across the country as they wrestle with the legacy of the coal industry and what its future should be under the Trump Administration. From Appalachia to the Montana coal plant that provides 30% of Redmond's power, the film goes beyond the rhetoric of the "war on coal" to present compelling and often heartbreaking stories about what's at stake for our economy, health, and climate. The film invites us to learn more about an industry on the edge and what it means for the lives of everyone involved, including ourselves.**
